About This Game

Strange things are happening at Great Britain's foremost natural history in 1890. A gang of ruthless thugs has broken into the establishment, the Eye of Isis Egyptian statue has been stolen, and a mysterious fog has overtaken a number of areas of the museum killing and transforming all it comes into contact with.

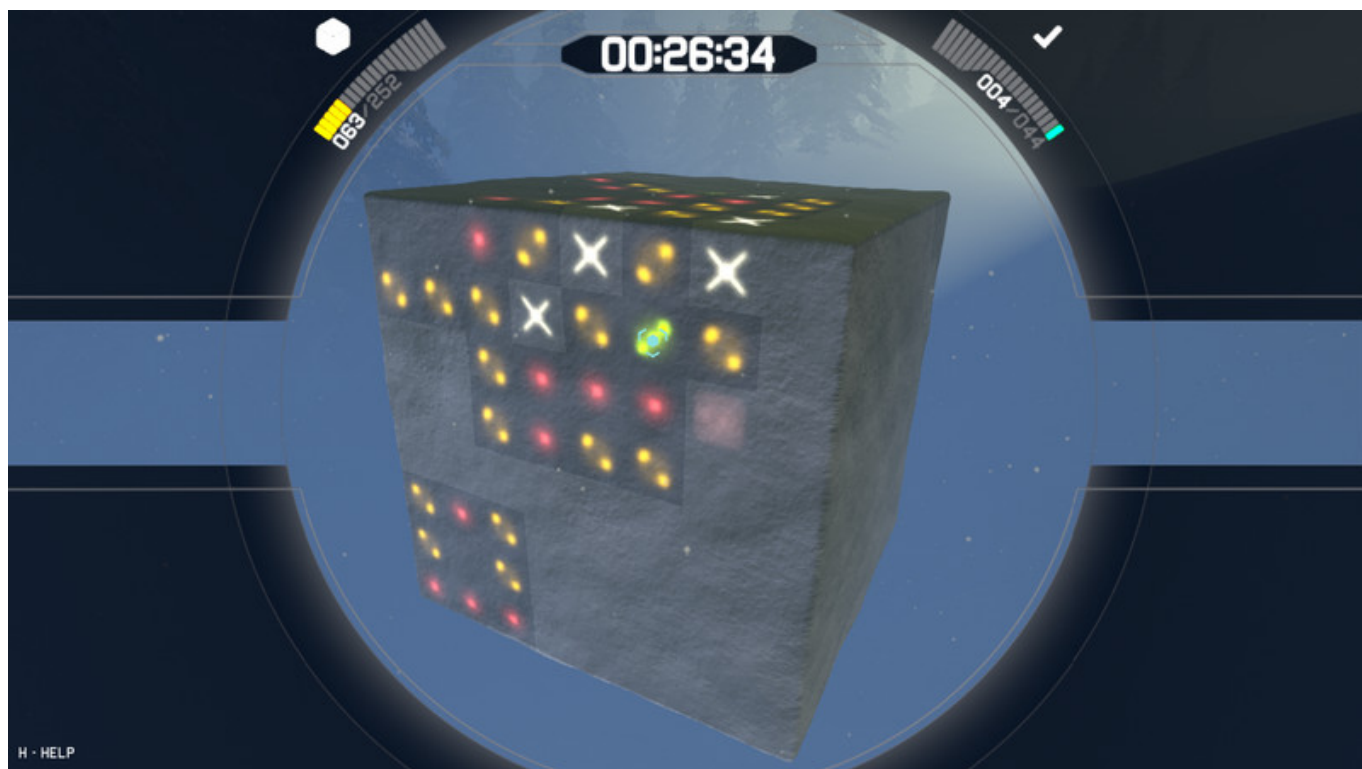

In this survival horror game you will be playing as museum curator/archeologist Victoria Sutton and her childhood friend Darien

Dane, you'll have to fight the various beings and entities created by this fog. You'll spend considerable time in the museum, take a steam train to the coast and travel the seas in a huge cargo ship before finally entering the pyramid tomb where you must find and destroy the source of this ancient evil.

One of my favorite CoG games along with Tin Star Hero. Community College Hero easily has some of the best writing out of those types of games along with very gripping emotional scenes!. For having played this game over 200 hours and having experienced its first version and its evolution to the present stage I think I can write a complete evaluation. First of all, SURVIVAL is aimed at players who are constantly looking for pvp and not looking too much at the visual quality of the game (even if it improves as the game progresses). Indeed, even if the textures and 3d models are not excellent you will never be disappointed by the tension that prevails in the servers of 30 players in deathmatch and 40 on squad servers on a map quite diverse (schools, churches, factory, apartments, yards, bunker ..). The loot is quite present and you will not have to wait 1 hour before finding a weapon. Besides the game includes many weapon models and the dev add frequently new weapons. In terms of cheat the game has improved to have experienced the old version in which we could not do 100m without meeting a Russian in underpants with ak and without forgetting the guys who put themselves under the map to swallow the face with impunity. Now all this mess has been settled and for 30 hours played on the new version I can confirm that I did not meet any cheater however this problem should not be forgotten for the next update. If I had to notify a negative point it would be the craft that does not exist yet ..

To conclude I would say that SURVIVAL can satisfy you if you are poor, pvp enthusiast and not interested by awesome graphic level.

Pour avoir joué ce jeu plus de 200 heures en ayant connu sa première version et son évolution jusqu'au stade actuel je pense être en capacité de rédiger une évaluation complète. Tout d'abord SURVIVAL s'adresse aux joueurs cherchant constamment le pvp et pas trop regardant sur la qualité visuelle du jeu (même si elle s'améliore au fur et à mesure des MAJ). En effet même si les textures et les modèles 3d laissent à désirer vous serez jamais déçu par la tension qui règne dans les serveurs de 30 joueurs en deathmatch et 40 sur les serveurs squad sur une map assez diversifiée (écoles, églises, usine, appartements, chantiers, bunker...). Le loot est assez présent et vous n'aurez pas à attendre 1h avant de trouver une arme digne de ce nom. D'ailleurs le jeu comprend de nombreux modèles d'armes et les dev en rajoutent de temps en temps. En terme de cheat le jeu s'est bien amélioré pour avoir connu l'ancienne version dans laquelle on ne pouvait pas faire 100m sans croiser un russe en slip avec une ak et sans oublier les mec qui se mettaient sous la map pour te rafaler la tronche en toute impunité. Maintenant tout cela est réglé et en ayant joué une trentaine d'heures sur la nouvelle version je peux vous confirmer que je n'ai croisé aucun cheater cependant ce problème reste à surveiller pour les prochaines maj. Si je devais notifier un point négatif ce serait le craft qui n'existe pas pour l'instant..

Pour conclure je dirais que SURVIVAL peut vous plaire si vous êtes pauvres, adepte de pvp et pas intéressé par une qualité visuelle de folie.

<https://steamcommunity.com/groups/Vldsfr>. it is hard as all hell to set up the controls so why should i even try to play this game??Ive been trying to set up a gamepad as the second player input but of course the game automatically sets it to first players and i want to keep it as a keyboard.. DMC4 is a fun hack-and-slash romp. with two distinct styles of play. As you progress through the various levels and difficulties, you slowly accumulate power, and become something akin to a ♥♥♥♥♥♥talking, pizza-eating badass. And by akin to, I mean that's exactly what you become.

[There are two characters in DMC4, each with their own style of play- you play as Nero for the first half of the game, and the overall series protagonist, Dante when he is incapacitated.](#)

[Nero uses his demonically-enhanced arm, the Devil Bringer to pull off most of his special moves, which mean most of them are grappling moves. These range from just slamming a common foe to the ground to tossing and flinging a boss through the air. In addition, he wields his sword- the Red Queen - and his revolver- the Blue Rose. Each can be charged for more powerful attacks.](#)

[Dante is a more versatile character from the time you get him, wielding three weapons at the beginning and gaining four \(well, five\) as you progress. Each weapon has its disadvantages and advantages \(Gilgamesh is slow, but strong i.e\) and can further](#)

diversify it's moveset with the use of **Styles**- which allow you to further customize how Dante plays.

If I have any complaint, it's that some of the button prompts have been unchanged from their original console release..
Awesome! Works very Good. Love this Game!. I bought the base OWH at -80% discount and that was indeed a great game for
a price under a dollar. If you notice it, the price of this DLC is so high compared to the base game but it still worth the money.
This DLC features more improvements , balancements, more items, more NPCs, new battle system, and more. OWH and OWH
Plus have a slightly different system so some items in the dimensional vault in your base OWH will be affected (converted) and
the save data in base OWH can't be used on OWH:Plus (the save data, not the game progress).

By buying this DLC you will get:

+ New Classes, items, NPCs, enemies, skills, and more

+ Castle renovations and quests

+ More keys like shortcut and the acceleration key

+ Even better HUD and systems (food rotting, and so on)

+ More allies including packhorse, packrabbit, a cow, and more

- I don't know why but the 'steam overlay' didn't work when playing (maybe they will fix this later)

If you like the base OWH, you will like this even more (man, it's a plus version!).. Well, For 99 Cents USD (59 cents on sale on
launch day) you get a very fun game that you can sit down and play through for some good fun. Great game to let off some
steam (Ha, get it? Steam? Why do I try?) or to explore a different genre. I know most people's librarys these days are mostly
just FPS games like COD, Battlefield, and CS, so games like this are fun to play inbetween, a little breather from the fast-paced
action of AAA games.

Pros:

Great graphics.

Graphics really complimented by the music!

Fun to play with good mechanics.

Cons:

As I played, I could'nt help but think, "Hey, this reminds me of Mario! Hey, So does this! Hey! This reminds me of M...
Metroid!(Caught you off guard, didnt I?)

In conclusion, this is a great project, and it is worth every penny.

I Tried to play and Sadly I cannot get it to work. I tried the noted fixes but they didn't work!. This game is unpolished, misleading, but somewhat fun gameplay. Still rating it down. Bought this game and now its free to play. Great party game! Controllers work great, game is easy and quick to learn, art is cute, and characters are fun.. Innovative at first, slowly becomes a drag and torment trying to solve the next puzzle.

Gave me migrant.

Playable.

Buy only if with discount or coupon.

. An enjoyable and challenging (at least for me, it is) drawing puzzle platform game.

100% Achievements obtainable by completing the game.
